## MEDTECH TO FEATURE ROSA ROBOTIC SURGERY SYSTEM AT EUROSPINE 2015

Montpellier, France, Aug. 27, 2015 – MEDTECH (Euronext, FR0010892950 – ROSA), a company specialized in designing, developing and marketing innovative surgical assistance robots, is proud to announce that it will feature its ROSA™ robot at the Annual Congress of the Spine Society of Europe, or EUROSPINE 2015, Sept. 2-4, in Copenhagen.

EUROSPINE is the most important platform for exchanging the latest research and innovations in the prevention and treatment of spinal disorder, attracting approximately 4,000 neurosurgeons and spine specialists each year. Medtech will have two ROSA™ robots at its booth (#150) for demonstrations of surgical procedures on the spine and brain.

At noon local time on Sept. 4, Medtech will host a workshop for EUROSPINE 2015 attendees titled: “Robotics and spine: Early experience with ROSA and perspectives.” This workshop will be hosted by Drs. Anthony Fichten and Michel Lefranc, neurosurgeons at Amiens University Hospital Center, the first hospital in Europe to purchase the ROSA Spine system. Amiens University Hospital was also one of the very first to use ROSA Spine in clinical trials led by Drs. Fichten and Lefranc.

“The aim of this meeting is to provide surgeons and specialists with an exchange for the newest tools, techniques and approaches in spine. EUROSPINE allows us to combine our existing knowledge and to develop and implement new concepts for the benefit of patients across Europe. As early ROSA adopters in both brain and spine surgeries, we look forward to sharing the latest from Medtech, and ROSA Spine during our workshop,” said Dr. Lefranc.

### About MEDTECH

Founded in 2002 by Bertin NAHUM and based near Montpellier, MEDTECH is a European specialist in the design, development and marketing of innovative robotic appliances to assist surgeons during their medico-surgical interventions, thus contributing to the implementation of safer, more efficient, less-invasive treatment.

In 2007, MEDTECH developed ROSA™, an innovative technological device devoted to brain surgery procedures. ROSA™ has been approved in Europe, the United States and Canada.

In 2013 Medtech received the « European Company of the Year Award » in the “robotic neurosurgery” category from Frost & Sullivan.

In July 2014, MEDTECH obtained the CE marking for its new product ROSA™ Spine, a robotic- assistive device for minimally invasive surgery of the spine.

In October 2014, MEDTECH won the « Révélation » prize in the Mediterranean Deloitte Technology Fast 50 Awards.
